- Beachflags
- Pennants

Pro's

- 100% polyester
- Knitted fabric
- Suitable for water-based dyes
- Approx. 115 gr/m2
- Semi shiny
- Environmentally friendly

If you choose Fairlyn Flag, you help to bring back the waste from our ocean, because this newest flag fabric from FaberExposize is made of recycled PET material. In every m2 flag fabric no less than 5 PET bottles have been processed.

And that is not all. The manufacturing of Fairlyn Flag only costs 2/3 of the energy it takes to manufacture regular flag fabric.

For the printing of Fairlyn Flag we use water-based inks, not environmentally harmful dyes.

And also for used flags we have nice solutions.

What do you think, for example of a carrying bag, hammock or pouch?

We have a partnership with LessWasteProduct, a creative party specialized in upcycling of materials that usually are discarded.
