PRODUCTION - PRINTING TECHNIQUES

FaberExposize offers several printing techniques. The choice of printing technology depends on the size of the print, price, delivery, design and application of the product.

Digital printing

Developments in digital printing has taken great steps forward. Large runs are no longer uncommon in digital printing and the end result is of the highest quality both visually as well as in durability.

FaberExposize has invested in a large and modern fleet of high capacity digital printers for any material. We offer versatile printing capabilities; sublimation, latex, direct and UV printing.

Screen printing

For large volumes, screen printing results in a lower price compared to digital productions. The textile is saturated with color and gives 100% print through and strong, clear colors.

FaberExposize has a screen printing facility in Asia, and supplies products worldwide.

For more detailed advice regarding the choice of materials, information on printing techniques and consulting customized projects - contact us at FaberExposize.

CORPORATE SOCIAL RESPONSIBILITY

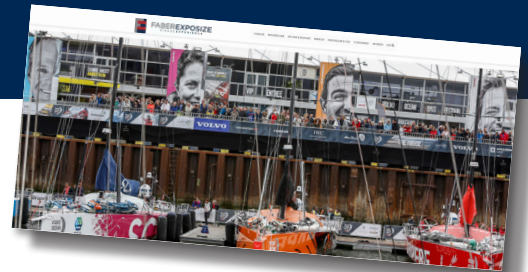

As one of Europe's largest signmakers FaberExposize is examined regularly by large multinational companies. This ensures that we constantly improve ourselves and have a sustainable production in terms of the environment, working conditions and social responsibilities.

We are often reviewed by our clients, which means that FaberExposize must live up to the high standard requirement in all areas, whether it is seasonal or if production load is high or low.

Our production companies are approved in many audits, such as ISO, SGP and IWAY surveys and thus delivers to the world's largest furniture producers, breweries, ice cream companies and such.

In addition to this, FaberExposize complies with all requirements and standards that the EU provides, such as REACH Regulation.

It is important to protect our customers, by providing good working conditions for our people. Therefore we strive to offer all our employees an attractive corporate culture in which they can develop.
