Easy Up

Easy Up is a line of parasols with a convenient and intuitive opening system. Just push the special handle up and secure the canopy. This simple method and wide range of available sizes make the parasols in this line perfect for gardens, hotel patios as well as beer gardens. The parasol's canopy, offered in the shape of a circle or square, makes it the ideal medium to promote your brand.

Classic

The classic elegance. An incredibly versatile parasol with a wide range of applications. It features simple and reliable opening system that uses a rope. As standard, the cover is finished with a valve that allows the air to circulate and increases stability of the parasol in the wind. It's also possible to finish the canopy with a second roof. The extraordinary functionality and versatility of this parasol makes it one of the most-bought models.

Telescopic

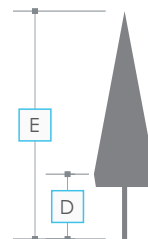

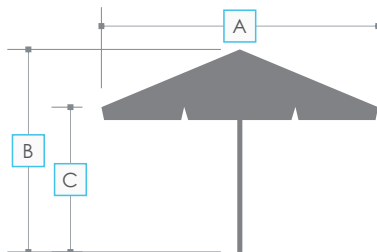

Comfort and convenience. Parasols from Telescopic line are a solution that will work perfectly in restaurant gardens and cafes. Thanks to the telescopic construction, the parasol canopy automatically rises during closing and freely closes above the level of tables and chairs, saving you the effort to move them. The parasol cover is normally finished with a valve that allows the air to pass through the canopy, thus increasing the stability of the parasol in the wind. Our many years of experience in the production of personalized products gives you confidence that the print on the parasol will be characterized by durability and high quality reproduction of details.

Restaurant & Cafe *Café Art*

Side Leg RIO

Stand out with modernity. Parasols with side leg Rio and Ibiza are the perfect, eye-catching advertising medium for exclusive brands, hotels and restaurants. The lateral position of the leg allows full use of the shaded area under the canopy, does not interfere with visibility and does not restrict placement of the furniture under the canopy. Parasols have adjustable angle of the canopy, so you can better match them to the solar conditions. Additionally parasols can be equipped with a mosquito net, which will be great for summer evenings.

Strong

The Strong line was created for customers using parasols in particularly demanding weather conditions. This is one of our most durable parasols with reinforced, thicker mast and arm profiles. The parasol is provided with a telescopic opening system that lifts its canopy when closing.

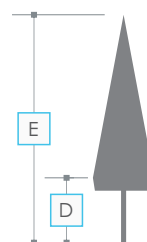

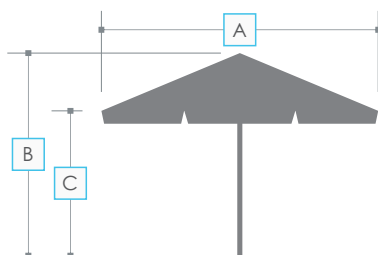

As a standard the parasol is finished with a valve that allows free air circulation through the canopy. Additionally, we also offer the option of finishing the parasol with a second roof.

Giant

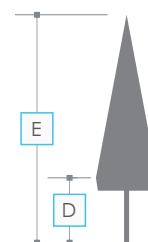

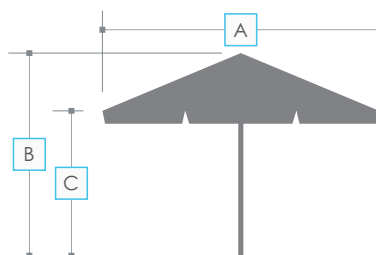

Giants among parasols. Giant line parasols guarantee eye-catching look and the possibility of shading a very large area using one parasol. It's ideal solution for hotels and big restaurants. The reinforced, twelve-arm structure of the frame guarantee safety and stability. The practical telescopic opening system is operated with a crank. The canopy of each Giant parasol is finished with a second roof that ensures optimal air circulation.

Rectangular

Perfectly matched. Rectangular parasols are an original way to promote your brand. Rectangular shape allows optimal use of narrow spaces.

The telescopic opening system lifts the canopy of the parasol when closing so that the parasol can be freely closed above the tables and chairs. As standard, the canopy is finished with valve that allows free air circulation. In addition, you can combine many parasols into one roof using special gutters.

Awnings and terrace roofings

Awnings over terraces and restaurant gardens will allow you to arrange a unique and special place for your business. They are a great alternative to popular garden umbrellas. They provide an excellent shading area

- a suitably selected size will shadow the entire area using just one awning. Due to the possibility of personalization of the sheathing, the awning will not only provide protection against weather conditions, but also is an eye-catching media for your advertising. The solutions applied in our products, such as sensors for closing the awning at a high wind, will improve their handling and the comfort of use.

Duetto Classic

Cover	Acrylic fabric

(values given on the basis of tests carried out in laboratory conditions)

The aesthetics goes for us hand in hand with the high quality and durability of the product. To confirm the optimal strength of our umbrellas, we subject them to demanding tests in the wind tunnel of the Institute of Aviation. In addition, the fabrics used to produce the canopies of our umbrellas are tested, among others, in terms of their waterproof, water resistance and UV resistance. All these tests allow us to verify whether our product will meet such challenges as adverse weather conditions i.e. strong wind blowing, rainfall or exposure to the sun. This way, we can be sure that safe and high quality products are delivered into the hands of our customers.

Printing

Screen printing			
	Flat printing	Rotary printing	Manual printing
Print report	6 m	Not applicable	–
Print width	2,45 m	1,8 m	–
Number of colours	7	9	5
Advantages	Possibility of printing large formats	The best method for printing the fabric in a full-colour (continuous model)	Possibility of printing on the dyed fabric
	The high coefficient of UV resistance	The high quality of the fabrics reprints	Possibility to produce small series
	The high printing productivity for large series	The high printing productivity for large series	The high coefficient of UV resistance

Digital printing			
	Solvent	Sublimation	Direct printing
Print report	18 m	10 m	10 m
Print width	3,2 m	2,4 m	2,4 m
Number of colors	6 (CMYK+LC, LM)	4 (CMYK)	4 (CMYK)
Advantages	Unlimited printing possibilities		
	Short period of the printing's preparation		

Recycling polyester fabric

Products containing plastics

Recovered plastic elements

Selection and grinding of material

Yarn production from recycled components

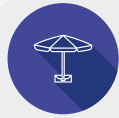

Finished fabric made of recycled plastics

How do we reuse PET material?

x 64
500 ml

x 233
500 ml

Promotional parasols of the rPET series are made of not less than 65% of all recycled materials, including: the share of recycled yarn in the sheathing - 100% and recycled aluminum in the frame - 90%.

Product offer made of rPet

As part of the rPet product range, we are able to provide certificates confirming that the products come from the recycling process. Additionally, labels on our products or other characteristic markings bear the word „recycled“.
